Open Alps – Ideas have no borders

The OpenAlps project closed on the 30th of September however partners are defining future activities to continue fostering Open Innovation in SMEs. The services and tools established by OpenAlps are built to last and partners are committed to expand the innovation network.

The high participation in the events and the increased registrations on the platform in the last month confirmed the interest from innovation seekers and solvers that Open Innovation is a topic of high interest.

Although the project has come to an end the local contact points remain available to support SMEs and R&D centers on the platform and through trainings or awareness raising events. You can discover the initiatives by getting in touch with your local contact point.

To summarize this three years we realized a booklet of results that illustrated the main activities carried out within the projects and what we have achieved. You can download the [booklet here](#).

Thank you for sharing your ideas with us!
